

IT Business Analyst for SAP CRM High Tech (f/m/div)

*

Job description

Do you like to translate customer requirements into IT solutions? Are you passionate about delivering the best experience to Infineon customers? At Infineon, we are looking for an IT Business Analyst, who joins our IT team and become part of growing High Tech Channel Management CRM Journey: if you have an eye for the big picture, like to bring in new ideas and want to develop them in a global environment that strives for global standardization, digitalization and harmonization, we are looking forward to your application!

In your new role you will:

- Work in a **global IT team** to ensure running of **overall sales process** with existing and future IT landscape
- Close integration with Global IT and business team located in different time zones
- Assist business in **writing the requirements** and **convert them into technical documents**, which can be used by External Vendor to implement and ensure the business functionalities are carried forward
- Work closely with **multiple service providers** on best possible solution and prepare solution design and program the solution if need arise
- Drive and **Manager Strategic IT Projects** for Global Organization
- Propose and Deliver the new Generation of CRM IT Landscape based on SAP
- **Assure compliance** with Infineon business compliance guidelines

Profile

As a true team player, you cooperate across boundaries, appreciate the contributions of other team members and respect their different attitudes and points of views. At the same time, you have a clear notion of how innovative IT solutions contribute to the commercial success of the company. In order to reach best results, you establish lasting relationships with your customers and listen actively to their thoughts and ideas. Furthermore, you know how to balance those requirements with technical or legal possibilities – and you are able to show them the added value of our available solutions.

You are best equipped for this task if you have:

- A degree in Informatics, Computer Science, Data Science, Business Administration or a similar field
