

Senior Manager Analog Mixed Signal IC Design (f/m /div)*

Job description

Do you have extensive experience in Analog and Mixed-Signal Design? Are you looking for a new career challenge where you have the chance to apply your technical expertise but also develop your management skills? Do you want to be part of a company that is a world leader in audio power amplifier ICs? Then Infineon in Herlev, close to Copenhagen is the place to be! Apply now and become our Senior Manager Analog Mixed Signal IC Design and contribute to developing our next-generation solutions!

As Senior Manager Analog Mixed Signal IC Design, you will have the opportunity to lead an experienced team of engineers, while being technically involved in developing our Class D Audio Power Amplifier ICs.

In your new role you will:

- **Drive and facilitate the development of people, skills, and working methods** in the Analog Mixed Signal IC Design Team;
- Provide **technical sparing** and participate in **design tasks**;
- **Coordinate IC development activities** in cooperation with the Project Manager;
- **Cooperate closely with our international teams** on product definition, design, verification, test development, quality, and applications;
- **Keep stakeholders updated** on risks, projects, and organizational matters

Profile

You are passionate about the latest technologies and you use them effectively to get the job done. You are a capable leader with strong communication skills and a high ability to motivate and identify high potential among your team members. Moreover, you have strong collaboration and interpersonal skills, which are essential for close work with colleagues from other divisions in an international setting. Lastly, in your day-to-day work, you act lean and fast and strive for continuous improvement.

You are best equipped for this role if you have:

- A **Master's degree in Electrical Engineering, Microelectronics**, or similar field of studies;
- At least **5 years of experience as Analog/Mixed Signal IC Design Engineer**;
- At least **5 years of experience as Technical Team Lead or IC Design Manager**;
- **Solid understanding of analog/mixed-signal IC design flows**;
- **Fluency in English** (mandatory).

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –

Infineon **PSS** semiconductors are enabling intelligent power management, smart sensitivity, and fast, reliable data processing in an increasingly digitalized world. Our state-of-the-art power and connectivity devices make chargers, servers, mainboards, power tools, lighting systems, and speaker amplifiers smarter, smaller, lighter, and more energy-efficient. In addition, our trusted sensors give things an intuitive sensing capability to make them contextually aware, and our RF chips support fast and reliable data communications.
