

Senior Project Director Power Modules (f/m/div)*

Job description

You are an experienced project manager, eager to proactively drive new technological trends? You have passion for teamwork with diverse, cross-functional and international colleagues? Then join a highly committed international team within our Power & Sensor Systems Division. As Senior Project Director for Power Modules, you will take the overall responsibility for a program linked to state-of-the art assembly technology, enabling coming generations of our integrated power supply product families.

In your new job you will:

- **Lead a program linked to state-of-the art assembly technology** with noticeable impact for our DCDC Business Line
- **Define program targets** according to business requirements and technical capabilities
- **Manage cross-divisional & international stakeholders**, develop adequate communication strategy to ensure a smooth execution of the program
- **Be responsible for the project managers & work stream owners within the program**, overseeing the projects execution, their inter-dependencies and impact on the overall program
- **Ensure** that the program and its corresponding projects are **in compliance with internal rules and regulations**
- **Assume full responsibility for your projects** by continuously assessing the progress and adjusting the project plan to ensure that goals are met even in the face of challenges; this also involves **anticipating and proactively managing significant changes** to the existing project agreement

This position is part of the Project Management Career Path. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

Profile

You communicate openly, clearly and act as a visible role model of what you expect from others. You recognize new opportunities and cooperate across boundaries to pursue them effectively. You ensure high quality by foresighted planning, understand root causes of potential project delays and develop suitable solutions.

You are best equipped for this job if you have:

- A **degree in Electrical Engineering, Physics, Microelectronics** or similar
- At least **10 years of professional experience** and thereof **8 years of leading complex projects and project teams**

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– Power & Sensor Systems (PSS) drives leading-edge power management, sensing and data transfer capabilities –

Infineon **PSS** semiconductors play a vital role in enabling intelligent power management, smart sensitivity as well as fast and reliable data processing in an increasingly digitalized world. Our leading-edge power devices make chargers, adapters, power tools and lighting systems smarter, smaller, lighter and more energy-efficient. Our trusted sensors increase the context sensitivity of “things” and systems such as HMI, and our RF chips power fast and reliable data communication.
