

Manager R&D Excellence (f/m/div)*

Job description

As Manager R&D Excellence, you play a key role in continuously improving the division's R&D activities in order to become faster, leaner and better. You take an overall perspective on the division's R&D organizations, and you deal with a multitude of diverse stakeholder and challenging topics. In addition, you analyze complex sets of data in order to recognize patterns for improvement potential, as well as supply basis for decision making to the management. Eventually, you might find improvement potential where we did not even know it existed!

In your new role you will:

- Interface with different stakeholder throughout the corporation in order to **facilitate and improve complex R&D processes** (e.g., Product Lifecycle Management), representing the interests of the division
- Foster, drive or support activities in order to **accelerate the product development process** throughout the division
- **Perform data analysis and reporting of R&D data** in order to extract relevant information and to facilitate decision making in top management
- Identify relevant patterns, relations and interactions in **complex and big data sets**
- **Maintain and extend existing analytics infrastructure** and create added value by integrating new sources of information
- **Train and consult** project managers and development engineers regarding R&D processes and tools
- **Support digitalization** with fast prototyping and proof of concept by developing mock-ups, simple applications, demonstrators

Profile

You take information quickly, evaluate it from different points of view and uncover hidden correlations in it. In your daily work you pursue high quality and love to translate your ideas into activities. You are a real Team-player, have excellent communication skills and are able to see our common goals and your responsibilities in it. You create new ideas for improvement potential and act proactively and passionately for their realization. Then you should join us. We are looking forward to welcoming you in our team!

You are best equipped for this task if you have:

- A degree in **Computer or Data Science, Mathematics, Physics, Engineering Science** or similar with focus on **Data Analysis and Visualization**

At a glance

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –

Infineon **PSS** semiconductors are enabling intelligent power management, smart sensitivity, and fast, reliable data processing in an increasingly digitalized world. Our state-of-the-art power and connectivity devices make chargers, servers, mainboards, power tools, and lighting systems smarter, smaller, lighter, and more energy-efficient. In addition, our trusted sensors give things an intuitive sensing capability to make them contextually aware, and our RF chips support fast and reliable data communications.
