

Senior Project Director Frontend Production Management and Strategy (f/m/div)*

Job description

Would you like to be the driver of cross-locational and cross-organizational projects with high complexity? Furthermore, would you like to gain exciting insights up to the management board level and build up an outstanding network? If you also possess experience in production management or strategic planning or technology transfers, then this is the perfect job for you. As Senior Project Director Frontend Production Management and Strategy, you manage highly complex projects, reach and impact on parts of the company. In addition, you manage large and diverse project teams as well as ensure organizational learning and continuous process improvement. Take your chance and apply now! This position is part of Infineon's Project Management Career Path. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- Apply project management methodologies to **structure projects** and **control progress**, while **assuring compliance** of the methodology to risk management
- **Lead others to tackle unique tasks** as well as use conceptual and innovative thinking to **develop solutions to solve complex problems** with broad impact on the business
- Focus on **project quality**, assess **progress** and ensure that **goals are met even in the face of challenges**
- Establish a **communication framework** and constantly ensure that all **relevant information is provided in time** to all levels of the project organization
- Anticipate and evaluate **emerging trends on project management methods** to be applied in future projects

Profile

You collaborate beyond boundaries, take different points of view in consideration and provide others with new impulses for open topics or unsolved issues. You use your resources sustainably, harness the creative potential of your team and strive for outstanding results with a passion. In pursuing your goals, you are prepared for risks and know how to actively manage them.

You are best equipped for this task if you have:

- A degree in **Economics, Electrical Engineering, Industrial Engineering, Physics** or similar
