

Technical Product Owner for Software Development Infrastructure (f/m/div)*

Job description

We are looking for a tech-savvy person with interest to provide IT environments and DevOps engineering practice that allow for state-of-the-art (Embedded) Software Development. As Technical Product Owner for Software Development Infrastructure, you will take responsibility for ease configurable Software Development and Test environments for our global R&D communities. You work with our software development teams to enable them with the best-fit solution. Our global IT team is on the leading edge of Infineon's transformation to agile Software development and to digitalize our products and services. Sounds interesting to you? Then take the opportunity and send us your resume.

In your new role you will:

- **Provide a best-fit integrated set of tools and infrastructure** that address the ambitious needs of Infineon's Embedded Software Development
- **Drive for best practices** and consult R&D project to take full advantage of IT solutions and Infineon shared source code
- **Design new technical concepts** and implement complex IT systems that fit the requirements of a diverse global user community
- **Own applications and self-dependent develop** them in functionality and stability
- Occasional **lead projects** and task forces
- Establish lasting **relationships with our business customers** and collaboration partners

Profile

In order to establish a successful relationship with our internal customers, you actively listen and consider their point of view, thoughts and ideas. As a team player, you want to grow beyond supporting one team as DevOps engineer and are ready to provide 100 teams the best-fit SW development environment for their tests and joint development.

You are best equipped for this task if you have:

- A degree in **Software Engineering, Computer Science, Information Technology** or equivalent
- At least **5 years of professional experience** in Software Development Lifecycle, Continuous Integration and agile software development
