

Senior Staff Engineer for Package Concept Engineering (f/m/div)*

Job description

As Senior Staff Engineer for Package Concept Engineering you will be the first contact point for all backend related topics during the early product lifecycle. Beginning with first customer requirements you align with our technical marketing on product development strategies. With a multi-layered view on technical complex subjects and package knowhow you can implement your own ideas and solutions. The best part: You can drive innovation and see the results! With this position you will be entering the „technical ladder”: our career path for experts. While setting up collaboration between frontend/backend and product development teams you will be able to get a wide spread knowledge in packaging technology. As you continually expand both your expert knowledge and network to solve problems, you will position yourself as a communication hub - establishing the connection between package innovation, package manufacturing and product definition until its realization.

You should be enthusiastic and dedicated to your new role because you will:

- **Examine new package concepts** by considering alternatives and leverage synergies to other divisions and package development sites
- **Coordinate complex package development projects** in a global and interdisciplinary environment
- Be the go-to person for all backend relevant topics; therefore, **you collaborate closely with Application Engineering, Marketing, Product Development and Package Development/Innovation at our European, American and Asian sites**
- **Create and support innovative ideas in power electronic and IC packaging;** therefore, you are aware of relevant trends regarding packaging
- **Create package roadmaps for individual product groups** in collaboration with application engineering, marketing and backend innovation
- **Collaborate with Technical/Product Marketing to foresee future trends:** prepare package technologies by triggering innovation projects and prototypes
- **Actively drive problem solving processes** in the area of chip/package interplay

Profile

You like to collaborate with multiple stakeholders. Your specialty is the combination of working accurately and constantly bringing in new ideas. With this unique mix you produce results with real added value. If there's a flaw in a process, you are the one to find it and to add up all the strengths and knowledge from your team in order to solve the problem.

You are best equipped for this task if you have:

At a glance

Location: **Munich (Germany)**
Job ID: **348047**

Contact

Julie Danielsen Larsen
Talent Attraction Manager

- A degree **Electrical Engineering, Physics, Mechanical Engineering** or a related field
- At **least 5 years of relevant work experience** with focus on packaging of semiconductor products
- **Good understanding of application requirements** regarding packaging concepts, characteristics and related failure mechanisms
- Excellent **stakeholder management skills** to handle your internal and external global interfaces with your intercultural competencies
- **Intercultural awareness** and fun to work with different people and cultures; affinity to South-East Asia is a benefit
- Experience with **CAD** would be a big plus
- **Fluent English and German skills** in verbal and written communication

Benefits

- **Munich:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; On-site creche and kindergarden with 120 spots, open until 6pm; Holiday child care; On-site social counselling and works doctor; Health promotion programs; On-site gym, jogging paths, beachvolleyball, tennis & soccer court; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement ; Performance bonus; Reduced price for public transport and very own S-Bahn station; Access for wheelchairs

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Industrial Power Control (IPC) empowers a world of unlimited green energy –

Power semiconductors play a crucial role in increasing efficiency and reducing energy losses along the whole energy conversion chain.

As the global leader in power semiconductors, Infineon **IPC** delivers pioneering products, solutions and services for smart and efficient energy generation, transmission, storage, and use. We strive to make this planet a greener place where sufficient energy is accessible to everyone – wherever and whenever it is needed.
