

Principal Engineer Digital Design Radar (f/m/div)*

Job description

You love technology, a dynamic environment and want to be part of state-of-the-art developments? You like to cooperate across boundaries and are eager to contribute with your technical know-how? This is your chance: we are hiring a Principal Engineer Digital Design Radar (f/m/div) in Linz. Take the chance and apply now!

In your new role you will:

- **Drive methodology changes in the area of Digital Design and Digital Functional verification** but also in the cross-discipline areas with Analog Design and Firmware Development
- **Close cooperation with Concept Engineering** to develop new IP based on customer requirements
- **Take ownership and support the design in the adjacent disciplines**, especially Digital Functional Verification, Firmware, Component Verification until it reaches the customer
- **Develop and implement Scantest, Clock-/Reset Concepts, MBIST**

Profile

You are best equipped for this task if you have:

- **A degree in Electrical Engineering, Information Technology or Telematics** with focus on electronics
- **Experience in digital design methodologies** and tools
- **Excellent knowledge on IC design and verification tools** (Cadence, Synopsys)
- **Good knowledge of behavioral modelling languages** (especially SystemVerilog)
- **Experience in UVM methodology** is an advantage
- **Fluent English skills** with German as a plus

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group I (<https://www.feei.at/wp-content/uploads/2022/05/minimum-salaries-white-collar-workers-2022.pdf>). The monthly salary is paid 14 times p.a. We offer a higher compensation depending on your expertise and skills.

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.

About Infineon in Linz

Semiconductors are essential to realize key trends like eMobility, automated driving and secure, connected cars. Infineon Automotive (ATV) is the #1 semiconductor partner in the fast-changing automotive world, based on our system knowledge coupled with our passion for innovation and quality. We are a key driver in the ever-advancing pace of digitalization in the automotive industry. At our location in Linz we are focusing on high-frequency integrated switching circuits for automotive applications using state-of-the-art Bipolar/RF-CMOS semiconductor technologies as well as on complex mixed signal ICs that are used in high frequency radar applications (77/79 GHz). Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars.

Linz is the third-largest city of Austria located approximately 30 kilometers (19 miles) south of the Czech border. It represents a symbiosis of industry, culture and nature - surrounded by stunning landscapes. As UNESCO City of Media Arts, Linz is also one of the world's most future-orientated locations together with Lyon, Sapporo, Tel Aviv and Dakar. Austria's social and health care system is among the best in the world and for decades numerous international surveys have singled out the country as a particularly safe and wealthy country with a high quality of life.
