

Project Manager

Job description

Plan, organize, lead and control the project at Backend Development to successfully achieve all project targets in term of timeliness, quality and cost.

In your new role you will:

- **Track and report the project status** to all stakeholders with timely escalation as required.
- Ensure **proper Project closure and handover to operation**.
- Plans, organize, and control the **project/ sub-projects with minor complexity** (up to project classification class D), risk, impact and reach.
- Be fully **responsible for all operational decisions** in the project and for the successful achievement of all project targets (time, quality, cost and budget).
- Act as the **key communication interface** (for project related matters), representing Back End to other Infineon Divisions (e.g. Business lines, Central Functions e.g. Finance, PTI, FE Fabs, etc) .
- Forms and leads the project team and assigns responsibilities within project to Project Managers of sub-projects and Project Members.
- Uses **IFX project management tools** to structure projects, control progress and for reporting and documentation.
- Drives problem solving activities within the project using **standard IFX trouble shooting methodologies**, eg 8D, 5 Whys, etc.
- Continuously **focuses on project quality, assesses progress** and ensures that goals are met even in the face of challenges.
- **Identifies and manages changes and adapts project approach** if necessary.

Profile

You are best equipped for this task if you have:

- **Masters / Bachelor's Degree in Engineering** (Semiconductor Technology, Microelectronics, Automation, Mechanical, Electrical, Physics, etc). **Project Management Professional Certification** is preferred.
- At least with **6 years of relevant working experience** and **2 years of leading projects**.
- **Solid project management knowledge** in terms of project initiation, planning and closing including reporting and documentation.
- Good knowledge in semiconductor engineering and operation.
