Senior Engineer Lab Support

Job description

We are looking for an engineer who has experience in lab equipment / software purchase.

1. Independently manages lab equipment / software purchase, maintenance and equipment calibration process.
2. Effectively manages vendor and inter departmental negotiations to get hardware and software maintenance issues resolved.
3. Has capability to compile, summarize and publish measurement data. Support engineering activities on new product development.
4. Basic understanding of theory and operation of common lab equipment's.
5. Knowledge of validation/characterization program flows.
6. Expert in rework and assembly of boards. Is able to rework components.
7. Ability to develop schematic and layout with minimal supervision from block level requirements.
8. Ability to perform hardware and silicon testing tasks with minimal supervision.

Profile

1. 3+ years of experience in independently managing lab equipment / software purchase, maintenance and equipment calibration process.
2. Has capability to compile, summarize and publish measurement data. Support engineering activities on new product development.
3. Basic understanding of theory and operation of common lab equipment's.
4. Knowledge of validation/characterization program flows.
5. Expert in rework and assembly of boards. Is able to rework components.
6. Ability to develop schematic and layout with minimal supervision from block level requirements.
7. Ability to perform hardware and silicon testing tasks with minimal supervision.

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Connected Secure Systems (CSS) delivers security for the connected world –
The Connected Secure Systems (CSS) segment offers comprehensive systems for a secure, networked world with a portfolio built around reliable, trendsetting microcontrollers as well as wireless connectivity and security solutions. Over the past decades, CSS has developed microcontroller, Wi-Fi, Bluetooth and combined

connectivity solutions (known as connectivity combos) and hardware-based security technologies. The products are used in a broad range of applications: from consumer electronics, IoT and home appliances to IT equipment, cloud security and networked cars all the way to credit and debit cards, electronic passports and IDs. With its leading technologies in the areas of computing, connectivity and security, CSS makes a decisive contribution to protecting today's and tomorrow's networked systems.
