

Senior Project Leader Factory Integration

Job description

Are you looking for a new challenge? Do you want to run projects in an international environment? Read on! We are looking for an experienced Project Manager to manage artificial intelligence (AI) and advanced analytics project. As a Project Manager you always have the big picture in mind, drive your projects by ensuring schedule, scope and budget requirements are met as well as to foster sustaining relationships. As part of this role, you will be responsible to monitor project milestones and follow-up on the open actions items to ensure the projects are delivered on time and produce the desired results.

In your new role you will:

- **Act as the project manager for artificial intelligence (AI) and advanced analytics in a leading-edge semiconductor company.**
- **Conduct the full project lifecycle** with stakeholders, project team and management.
- **Plan the project for fast implementation** (define scope and objectives together with stakeholders, coordinate architecture design with experts, plan work packages and tasks, optimize project staffing with resource managers, agree derived timeline with business partners and assess risks for continuous mitigation).
- **Lead the project team during the execution phase** with persuasive leadership abilities.
- **Manage stakeholders and report progress to senior management.**
- Familiar with the **technology ecosystem of AI development** in a global enterprise (e.g. cloud computing, big data & micro-service architecture).

Profile

You are best equipped for this task if you have:

- An **outstanding bachelors/masters degree and project management certifications.**
- Previous **work experience to lead projects in the field of AI & SW development.**
- **High analytical skills** and keen **perception to approach new challenges.**
- **Excellent leadership abilities and strong self-management.**
- **Persuasive communication and presentation skills.**
