

Principal Engineer RF Test Development (f/m/div)*

Job description

Are you eager to further develop your competencies and to cooperate with an international team? Then seize the chance and become part of our success story, driving our applications into the world of tomorrow and beyond.

In your new role you will:

- **Be responsible for the backend test development** for RF mobile devices
- **Lead a small team of test engineers** technically as well as legally
- **Plan and coordinate test work packages** for running projects
- Get the opportunity to have a **deep introduction to our Infineon RF component test methods**
- **Optimize and improve existing test concepts** together with the team
- **Shape our future backend test landscape** ensuring sufficient test coverage and cost efficiency
- **Cooperate closely with different interfaces** such as concept engineering, circuit design, application and component verification as well as project management

Profile

You are best equipped for this task if you have:

- **A university or university of applied sciences degree** in **Electrical Engineering, Information Technology, Telecommunications** or **Mechatronics** with focus on Microelectronics or related studies
- **Expert knowledge** in **RF measurement techniques**
- **Experience in leading people** technically and legally
- Relevant working **experience in the field of test development** and/or **component verification**
- The **ability to learn fast**, like to get into new topics and **love to improve existing flows and methods**
- **Professional experience in the field of semiconductor** or **sensor/electronics development**
- **Fluent English skills**, German skills as a plus

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry,

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

About Infineon in Linz

Semiconductors are essential to realize key trends like eMobility, automated driving and secure, connected cars. Infineon Automotive (ATV) is the #1 semiconductor partner in the fast-changing automotive world, based on our system knowledge coupled with our passion for innovation and quality. We are a key driver in the ever-advancing pace of digitalization in the automotive industry. At our location in Linz we are focusing on high-frequency integrated switching circuits for automotive applications using state-of-the-art Bipolar/RF-CMOS semiconductor technologies as well as on complex mixed signal ICs that are used in high frequency radar applications (77/79 GHz). Automotive (ATV) shapes the future of mobility with micro-electronics enabling clean, safe and smart cars.

Linz is the third-largest city of Austria located approximately 30 kilometers (19 miles) south of the Czech border. It represents a symbiosis of industry, culture and nature - surrounded by stunning landscapes. As UNESCO City of Media Arts, Linz is also one of the world's most future-orientated locations together with Lyon, Sapporo, Tel Aviv and Dakar. Austria's social and health care system is among the best in the world and for decades numerous international surveys have singled out the country as a particularly safe and wealthy country with a high quality of life.
