

## Test Engineer for Power Semiconductor Modules (f/m/div)\*

### Job description

As a Test Engineer (f/m/div)\* you will be responsible for the procurement and development of test systems for testing power semiconductor modules. Become a part of Infineon Warstein - one of the world's top addresses for the development and production of power semiconductor modules!

As a Test Engineer for Power Semiconductor Modules (f/m/div)\*, you will set and test the quality standards of tomorrow!

Your new tasks will include:

- The **planning, procurement and release of test systems** for the series test of IGBT modules.
- Coordination and implementation of **activities for electrical and mechanical series testing**, including the necessary handling systems.
- Furthermore, the **implementation and release of test programs**
- Active support of the **test and handling systems** in production
- Supporting **capacity building measures within the scope of projects** (national and international)
- Active participation in **interdisciplinary and cross-location product development teams**

### Profile

You recognize and understand the fundamental causes of quality defects and derive appropriate solutions. You are prepared to take risks in a considered manner and to take appropriate action when necessary. In doing so, you address potential disagreements directly, promptly, and factually and take responsibility for common goals.

You successfully meet the requirements if you:

- Have successfully completed a **university degree** in the field of **electrical engineering, automation technology** or in a related field of study with a **focus on power electronics**
- Ideally, you have already completed **vocational training** or have **relevant initial practical experience**
- In addition, you should have **programming skills**
- Be able to communicate **fluently in German and English**

## Why Us

**Part of your life. Part of tomorrow.**

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

**Infineon in Warstein** is a leading global manufacturer of power electronic components. Around **2,000 people from 40 nations** come together here. The focus in Infineon Operations is to ensure and continuously improve the already existing valuable cooperation between the individual divisions and manufacturing, as well as purchasing, quality management and supply chain.

*\* The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
