

Senior Specialist Ramp Up & Change Management (f/m/div)*

Job description

In this challenging position, you will act as Ramp Up & Change Management Specialist within Infineon's dynamic Power & Sensor Systems division. As such, you will take over the responsibility for the initiation, driving and monitoring of all ramp up and manufacturing/product change activities for your assigned products, cooperating closely with a very diverse and multicultural team. With your hands-on mentality, you will tackle the target of achieving a fast, reliable and cost efficient ramp up of new products or most efficient and streamlined finalization of change notification documentation.

In your role as **Ramp Up Specialist**, you will:

- **Represent supply chain in new product development processes** from the project release phase until successful ramp up completion
- **Support project management** in synchronization between Product, Technology and Package projects to meet the overall timeline
- **Support master data set up** according to project requirements
- **Plan, order and execute sample orders** across multiple international sites
- **Support, moderate and lead ramp up teams** in the proper project phase to assure timely execution of early ramps as requested by marketing/customers and act as expert in proving the right tools to meet ambitious ramp up goals (e.g. early risk production, frontend / backend owner ramp)

In your job as **Business Change Specialist**, you will:

- **Support multi-disciplinary business unit change projects** with the goal of achieving the desired milestone in a timely and efficient manner (publishing of customer notifications)
- **Manage the change database and new master data** as required, working with the planning community for proper change over strateg
- **Cooperate with responsible business circles** to minimize sending customer notifications by synchronizing Frontend, Backend and product changes

Profile

As a true team player, you are aware of cultural differences, cooperate across boundaries and appreciate the contributions of other people. You anticipate the future needs of customers and engage actively with them. Your excellent communication skills enable you to interact successfully with various stakeholders. You keep the big picture in mind even in complex situations and are able to make decisions despite

uncertain circumstances.

You are best equipped for this task if you have:

- A **university degree** in an engineering, natural sciences or economics field with focus on supply chain management
- **Previous experience in logistics or supply chain as a strong plus**, ideally in the semiconductor industry (e.g logistic planner, ramp-up manager, sample manager, product support, production/capacity planner, project leader of smaller projects)
- The ability to **manage and comprehend complex supply chains**, by having big picture in mind and identifying important patterns / trends
- **Affinity for IT systems, data bases and data analyses** with good visual presentation skills as a big plus
- **Excellent communication skills** across technical, non-technical and management functions and also across 3 regions (EU, Asia and US)
- **Excellent English skills** with German skills or the willingness to learn it as a plus

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group F (<https://www.feei.at/wp-content/uploads/2022/05/minimum-salaries-white-collar-workers-2022.pdf>). Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –

Infineon **PS S** semiconductors are enabling intelligent power management, smart sensitivity, and fast, reliable data processing in an increasingly digitalized world. Our state-of-the-art power and connectivity devices make chargers, servers, mainboards, power tools, and lighting systems smarter, smaller, lighter, and more energy-efficient. In addition, our trusted sensors give things an intuitive sensing capability to make them contextually aware, and our RF chips support fast and reliable data communications.
