

Staff Specialist Wafertest Technology

Job description

Take over the responsibility during Test Package Transfer for wafer sort

1. Take over the responsibility during Test Package Transfer for wafer sort for:
 - a. Test Package Installation & Debugging
 - b. Test Package Correlation
 - c. Generate Correlation Report (e.g. AMSA)
 - d. Test Package Verification (on e.g. 1-2 lots)
 - e. Test Package Release for production
2. Wafer Sort Engineering for products sorted at test subcontractor:
 - a. technical support for subcontractor during engineering and production
 - b. engineering test support, engineering lot handling and test capacity scheduling for engineering wafers
 - c. support the external partner to install special tools/test required by IFX products
 - d. perform wafer sort process stability monitoring, improvement definition and drive improvement ,implementation at test house
 - e. drive probe card improvement at subcontractor (lifetime, test quality)
3. technical support for all wafer sort transfer related topics
 - a. interface between IFX and subcon
 - b. Alignment of technical requirements / supplier enabling and development
4. Data management
 - a. provide first level support for all data engineering related topics
 - b. alignment and support implementation of data provision/transfer processes
 - c. product related wafer sort data setup, validation and availability
 - d. ensure availability of logistical data for wafer sort at subcons/foundries

Profile

- Bachelor/Master of Science in Physics, Electrical Engineering or related science
- Good understanding of wafer sort process is mandatory
- Test platform knowledge / experience on J750 is necessary
- Team work in a multi-cultural surrounding
- Communication skills are mandatory
- Open communication and information exchange with counterpart

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.
