

Junior Project Manager Product Security (f/m/div*)

Job description

Your heart beats for Project Management and you are curious about Product Security at Infineon? You would like to do your next step and dive into multi-project management in an agile work area? Take the challenge and you will get various insights in a wide range of security products and applications. This position is part of Infineon's Project Management Career Path. It provides an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- Be the **Central Project Manager** for all **Product Security Evaluation** projects
- Take over **Multi-Project Management** (Agile - KANBAN) and **Risk Management** activities
- Be responsible for the **planning and execution of projects** within the Product Security organization
- Report to **development projects, Product Security Head** and **PMO Head**
- Act as the **functional communication interface** to development projects
- Closely cooperate with the PS Head regarding **technical alignment, resource management, continuous improvement**

Profile

You are keen on working in a diverse team and with various interfaces in an ambitious environment? Do you want to further develop your knowledge about Product Security at Infineon and be part of it? That is great! If you are additionally able to organize the work in a well-structure manner and to identify and manage risks appropriately, then you fit very well into our team.

You are best equipped for this task if you have:

- A **technical degree ideally in Electrical Engineering, Physics** or similar fields
- At least **2 -5 years of working experience** in **agile and classic Project Management** methodologies, as well as the ability to combine both methods into a hybrid setup
- Hands-on experience with **multi-project management** within the **semiconductor industry**
- Ability to act within a matrix-organization in a **functional leadership role**
- Capability to work within a leadership team
- Consolidated knowledge about how to use **JIRA** and **MS Project**
- Basic knowledge about the usage of **tableau**

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Connected Secure Systems (CSS) is at the heart of the IoT –

The **CSS** division provides end-to-end systems for a connected, secured world – building on trusted, game-changing microcontrollers as well as wireless and security solutions. CSS delivers microcontrollers plus Wi-Fi, Bluetooth® and combined connectivity solutions (known as connectivity combos) along with hardware-based security technologies to power the broadest application spectrum spanning consumer electronics, IoT devices, cloud security, IT equipment, home appliances, connected cars, credit and debit cards, electronic passports, ID cards, and more. The division is at the forefront of computing, wireless connectivity, and trusted technologies that are helping to securely connect the networked systems of today and tomorrow.
