

Engineer CPU & Crypto Cores (f/m/div)*

Job description

You want to contribute to making our connected world safer today and tomorrow? You feel passionate about the results of your work and are committed to achieving the perfect result? Are you eager to expand your knowledge each day and take on new challenges? Then this is your chance to develop the next generation of secured microprocessor systems! As an Engineer CPU & Crypto Cores, you play an integral role in making our hyper-connected IoT world both safer and more secure. With this position, you will enter our "Technical Ladder" career path. The Technical Ladder is a special career path for those who share innovative ideas, demonstrate comprehensive technical knowledge, show thought leadership, possess problem solving abilities and are able to create business value.

In your new role you will:

- **Design** dedicated **security processor systems** and **crypto-accelerators**
- **Develop secure implementation concepts** for processors and crypto-accelerators
- **Be in charge for the development** of all required components
- Perform **functional simulations, timing** and **power characterization** of your designs
- **Analyze** and **improve your designs** to protect them against security attacks
- **Evaluate verification** and **validation results** and ensure high quality deliveries
- **Release** as a responsible IP owner **the developed IPs** and support the product integration

Profile

You ensure that your ideas come to their full potential and implementation. Furthermore, you are able to cooperate across borders while valuing the contributions of others. Last but not least, you create a work environment for the highest quality standards.

You are best equipped for this task if you have:

- A degree in **electrical engineering, computer science, mathematics** or similar
- Preferably some **professional experience developing hardware IP**, or by obtaining a **PhD** in a related field
- Expert knowledge in **digital design** with good understanding of technology aspects
- Profound knowledge in **using design and simulation tools** (Modelsim, Questa etc., DC, IC)

At a glance

Location:

Job ID: **350294**

Start date: **Sep 01, 2022**

Entry level: **5+ years**

Type: **Full time**

Contract: **Permanent**

Contact

Tobias Pfundtner

Talent Attraction Manager

- Excellent **English** communication skills, **German** language skills are a plus

Knowledge in the following areas is **not mandatory but definitely useful** to master this job:

- Know-How in **cryptography and security concepts** for microprocessor systems
- Experience in **developing low-power concepts and designs**
- Expert **knowledge** in physical aspects of state-of-the-art **manufacturing technologies of integrated circuits**
- Some experience in **leading smaller teams and projects**

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Connected Secure Systems (CSS) is at the heart of the IoT –

The **CSS** division provides end-to-end systems for a connected, secured world – building on trusted, game-changing microcontrollers as well as wireless and security solutions. CSS delivers microcontrollers plus Wi-Fi, Bluetooth® and combined connectivity solutions (known as connectivity combos) along with hardware-based security technologies to power the broadest application spectrum spanning consumer electronics, IoT devices, cloud security, IT equipment, home appliances, connected cars, credit and debit cards, electronic passports, ID cards, and more. The division is at the forefront of computing, wireless connectivity, and trusted technologies that are helping to securely connect the networked systems of today and tomorrow.
