

Staff Engineer Test Development (f/m/div)*

Job description

You enjoy working in an international team and Modular Test Program Development is a known term to you? In this position, you will be responsible for the development of test programs and test hardware as well as debugging on ATE systems. Additionally, you develop and implement independently complex procedures for testing a chips functionality. With this position you will be entering our Technical Ladder: a special career path for those who share innovative ideas, demonstrate comprehensive technical knowledge, show thought leadership, possess problem solving abilities and are able to create business value. This position can be filled in Munich (Germany), Bucharest (Romania) or Graz (Austria).

In your new role you will:

- Be **responsible for production test, qualification and characterization**
- **Define, implement and document test cases** in close cooperation with other product development departments (system architecture, IC design, Software architect) and production sites
- Acting as an **expert for high parallel testing** and test methodology improvement
- **Optimize test methods** to improve quality and efficiency
- Actively **contribute to the test concept and test specification**

Profile

You understand your impact on others, think about your behavior, and constantly ask for candid feedback. You actively contribute to putting decisions to work as soon as they are taken. Furthermore, you take in information quickly, evaluate it from different points of view, and uncover hidden correlations in it.

You are best equipped for those tasks if you have:

- A **degree in Electrical Engineering** or a comparable education
- At **least 3 years of relevant professional semiconductor experience**
- **ATE experience on standard tester platforms** such as Teradyne and Advantest
- **Good understanding of analog/RF circuit and digital design**
- **Advanced programming (VB) and scripting (python) know-how**
- **Good understanding of SW architecture and SW engineering**
- **Analytical skills** with confident communication capability
- **Excellent English** and ideally **German** language skills

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Connected Secure Systems (CSS) is at the heart of the IoT –

The **CSS** division provides end-to-end systems for a connected, secured world – building on trusted, game-changing microcontrollers as well as wireless and security solutions. CSS delivers microcontrollers plus Wi-Fi, Bluetooth® and combined connectivity solutions (known as connectivity combos) along with hardware-based security technologies to power the broadest application spectrum spanning consumer electronics, IoT devices, cloud security, IT equipment, home appliances, connected cars, credit and debit cards, electronic passports, ID cards, and more. The division is at the forefront of computing, wireless connectivity, and trusted technologies that are helping to securely connect the networked systems of today and tomorrow.
