

Senior Staff AMS Methodology Engineer (f/m/d)*

Job description

To strengthen our mixed-signal methodology & implementation team we are looking for an AMS Methodology Engineer who is willing to strive for excellence in the definition of mixed signal design methodology. You will be part of an international team responsible for building the bridge between analog and digital design teams.

In your new role you will:

- Drive state-of-the-art **mixed signal design, implementation and Integration methodologies**
- Contribute to next generation **IP Integration and Mixed signal Methodology topics**
- Drive **Mixed Signal IP integration** with **Cluster/Sub-Systems and SoC**
- **Drive best practices and lessons learnt** from evaluations/benchmarks and customer interactions back into Methodology development
- **Share knowledge** with other analog/digital methodology experts at Infineon
- **Document methodology** and **evaluation results**
- **Closely cooperate** with **Digital Design Engineers, Analog circuit designers** and **physical design engineers**

Profile

You are best equipped for this task if you have:

- A **university degree in Electrical, Microelectronic or Computer Science Engineering**
- More than **5 years of experience in Digital/Analog and Mixed Signal Design methodologies**
- **Excellent software programming and scripting skills**
- Experience with **Cadence or Synopsys EDA tools**
- Knowledge of **Analog, Digital Design** and **IC Technologies**
- **Fluent English language skills**, German is a plus

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group G-H (<https://www.wko.at/service/kollektivvertrag/gehaltsordnung-elektro-elektronikindustrie-angestellte-2022.html?msclkid=2c05dd71d03e11ecb05174499dc8f20e>). The monthly salary is paid 14 times p. a. We offer a higher compensation depending on your expertise and skills.

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

The central R&D organization „**Design Enabling and Services**“ (DES) provides the design environment to the different Infineon product development teams. With state-of-the-art design methods, building blocks and a wide range of product development services DES supports Infineon's advanced IC development from early high level system models to verified products ready for manufacturing.

The City of Villach is located in the center of Carinthia, Austria's southernmost province, in close proximity to the Italian and Slovenian border. Due to its particular geographic location and the outstanding natural beauty of the region, Villach and the whole province of Carinthia have for generations been popular holiday destinations for people from all over the world. Its unique landscape combines mountains and valleys, lakes and rivers, city and countryside. In addition to the favorable geographic location, living in Austria also has many social, health-care-related and economic perks. The country's social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life. Villach benefits from its status as a "small town," offering everyday living at affordable prices in an outstanding setting. So it's no surprise that the city on the Drau is considered the "home of work-life balance".
