

## Electrical Laboratory Technician/Engineer (f/m/div)\*

### Job description

Do you feel at home when working around the lab? Do you wish to contact with the latest technology and equipment? In Budapest you will have the opportunity to join a motivated team of lab experts, where you can also become an important part of it. Embrace a stimulating career challenge by joining us as Electrical Laboratory Technician/Engineer!

As an Electrical Laboratory Technician/Engineer you will work in our Budapest's electrical verification laboratory. You will become an expert in measurements for Infineon's industrial technologies/products and thus ensuring our high quality standards.

In your new role you will:

- Carry out **electrical measurements** (e.g. short circuits, eon and eoff) for different product segments;
- Perform the installation, TPM (Total Productive Maintenance) and **operation of laboratory test equipment** (e.g. oscilloscope and voltage probes);
- Perform **equipment calibration**;
- Ensure the correct organization of the lab and workstation to **meet all safety standards**.

### Profile

You are a team player who demonstrates strong communication skills, and you quickly establish a successful cooperation by regularly sharing your insights with your colleagues. Moreover, you actively contribute to putting decisions to work as soon as they are taken, while supporting the team to excellence. You are proactive, responsible and careful in your actions, while maintaining accountability for them.

You are best equipped for this task if you have:

- Education with **focus on electronics measurements** (e.g. technical high school or university degree)
- Experience in **measurement technologies and equipment**.
- Entry knowledge of **power electronics semiconductors**.
- A highly **organized and methodic** mindset with great **focus on quality**.
- Good command of **English** and/or **German** language.

# Why Us

**Part of your life. Part of tomorrow.**

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

## **– Industrial Power Control (IPC) empowers a world of unlimited energy –**

Power semiconductors play a crucial role in increasing efficiency and reducing energy losses along the whole energy conversion chain.

As the global leader in power semiconductors, Infineon **IPC** delivers leading products and solutions for smart and efficient energy generation, transmission and consumption. We strive to make this planet a greener place where sufficient energy is accessible to everyone – wherever and whenever they need it.

*\*The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group.*

*At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
