

IT Solution Designer - Supply Chain Planning (f/m /div)*

Job description

Do you enjoy working at the interface between customer and supplier (Business and IT) to understand and translate business needs into functional design proposals? Do you want to proof new concepts and provide prototypes where beneficial and feasible? As IT Solution Designer you are part of a very versatile and global team responsible for the design of new and existing IT Supply Chain Management solutions while ensuring critical dependencies to architect standards. Furthermore, you will have the opportunity to make use of the latest trends like machine learning, AI and cloud technology to increase supply chain digitalization.

In your new role you will:

- Be responsible for the **development of IT Supply Chain Management solutions** by understanding business needs and translating them into **functional design proposals** (i.e. solution architecture)
- Provide **proof of concepts and prototypes for testing** to improve user acceptance and experience
- **Ensure compliance requirements** and the fit to architecture standards by considering the bigger picture
- Support the **implementation with our solution providers** as well as contribute to the **go-live, cutover and operations support**
- **Focus on, evaluate and drive UX and trend technologies** in the early stage of product lifecycles in cooperation with your team

Profile

While you cooperate across boundaries, you respect different attitudes and point of views and use the creative potential they offer. Thereby you are able to quickly establish a successful cooperation and actively contribute to putting decisions to work as soon as they are taken. You have the passion and the courage to develop new and creative ideas which you push to their full application and development.

You are best equipped for this task if you have:

- A good technical skill set based on a **degree in Information Technology, Electrical Engineering or similar**
- At least **3-5 years of professional experience in supply chain**, preferably within the semiconductor industry
- A **holistic understanding of requirements** and the ability to convert them into functional and technical designs

Talent Attraction Manager

- **Solid Oracle 12c skills to run SQL based ad-hoc analysis**, experience with **JDA** (Blue Yonder), **SCP/ESP** and **SAP S/4** would be a plus
- Basic skills in **enabling infrastructure** (Windows Server, UNIX, Octane, WebSphere MQS, SAP SLT), experience in **integration/interface design** across different platforms would be a great asset
- Fluent **English** language skills – German language skills are a plus

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

The **Information Technology** department has become an important business advisor for Infineon, converting business requirements into great IT solutions. It is responsible for provisioning hardware and software solutions at benchmark costs for all areas within Infineon reaching from office users to research & development, to frontend and backend production around the globe. More than 1000 IT-colleagues work closely together with other business areas and external partners. They increase the efficiency of business processes offering more than just modern equipment, secure infrastructure and newest communication solutions.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
