

Senior Manager Digital Design Engineering

Job description

In your new role you will take over technical leadership for developing features and functionalities on Bluetooth Digital IP/Subsystem across different generations. Apply digital design methodologies and flows to successfully develop digital IP.

In your new role you will:

- Take over technical leadership for developing features and functionalities on Bluetooth Digital IP/Subsystem across different generations
- Apply digital design methodologies and flows to successfully develop digital IP
- Work in all phases of RTL development flow in VLSI/SoC Design flow
- Participate in effort estimation, create project plans for local team members for task assignment and tracking
- Develop individual team members for their skills & competence
- Drive local recruitment process in hiring local talent
- Work with cross functional teams such as Firmware, Backend teams to get the Bluetooth IP implemented on SoCs
- Work with multi-site teams to collaborate and develop the IP.

Profile

We are looking for your experience across digital design, product development, people development and project management. Moreover, as a technical lead you are able to plan and track work packages, delegate tasks and manage relationships to key stakeholders.

You should have these qualifications:

- A degree in Electrical/Electronic Engineering, Microelectronics or a similar field
- At least 5+ years of experience as technical lead or manager in digital design
- A deep technical understanding in all aspects of digital front end development
- Proven technical leadership skills
- Sound programming skills and knowledge in scripting languages e.g Tcl, Perl or Python
- Extensive experience in RTL coding and knowledge of functional verification methods
- Willingness to apply newer methods/flows for front end design & verification
- Very good Communication skills.
