

Senior Manager Plan to Make Architecture (f/m/div)*

Job description

Do you want to shape the future of supply chain? You love data, processes and digitalization? Then take the chance and join Infineon as a Senior Manager Plan to Make Architecture and become part of an exciting global company dedicated to make the world more digital and more sustainable. You will be responsible for Supply Chain Business Process Architecture with focus across the Capacity & Production Planning, Production Scheduling & Make Integration Processes.

In your new role you will:

- **Drive Business Analysis of new SC demands with “overarching” Plan & Make processes** that include Production Planning, Production Scheduling, Contract Manufacturing, intercompany shipment & Manufacturing integration topics
- **Define the SC Concepts** in collaboration with SC & IT experts and architects
- **Support and lead global supply chain projects as subject matter expert, and play a key role in implementation** with focus on overarching Plan & Make processes
- **Drive and facilitate the discussions with business leaders** from Corporate Supply Chain, Frontend & Backend OPC teams to **identify business SC capabilities in relation to current and future business objectives** based on Integrated Supply Chain Roadmap
- **Collaborate with experts from IT & Factory Integration** on SC functional capability improvements **to fulfill current and future business objectives**
- **Analyze and extend (as required) the current Process Performance Metrics & KPIs** in the area of SC Plan and Make processes
- **Drive the continuous improvement initiative towards improving the SC Plan & Make Process KPIs** on regular basis with collaboration with SC Process owners and experts
- **Define SC Plan & Make solutions and capabilities with understanding the touchpoints and interdependencies** with Production, Procurement & Finance Controlling processes

Profile

You have a clear notion of how innovation contributes to the commercial success of the company and concentrate your creativity and knowledge on producing results with real added value. You are able to quickly establish a successful cooperation and clarify areas of responsibility, coordinate your work with colleagues, and regularly share your insights with them. You feel responsible for and contribute to the team's success and promote an awareness for quality in your area of work.

You are best equipped for this task if you have:
