

Staff Engineer Failure Analysis (f/m/div)*

Job description

Have you ever wondered how it is to work in a company that shapes the future? At Infineon we have the size, the capability and the opportunity to offer you this experience! Join us now as our new Staff Engineer Failure Analysis and develop your career further! Come on board and be part of Infineon Villach!

In your new role you will:

- Performing **electrical analysis** (technology development / product development / qualifications / customer returns)
- Determine **overall analysis strategy** (including chemical and physical analysis steps)
- Report and **communicate** various **results**, interface with relevant stakeholders and actively **participate** in **problem solving teams** and **task forces**
- Act as **analytical support** and **consult** product and technology development projects, problem solving teams, task forces
- **Establish analytical capability** for new products and technologies.

With this position you will be entering our „ **Technical Ladder**“: our career path for experts. You will be able to focus deeply on technology – while further pursuing your career. As you continually expand your expert knowledge, puzzle over matters and solve problems, you will position yourself as a thought leader – thus helping our products improve our world a bit more each day.

Profile

You are best equipped for this task if you have:

- A university **degree** (Master or PhD) in the field of **electrical engineering, electrical technology** or similar
- **Knowledge** in the field of **analog** and **digital circuit technology**
- Understand the **basics of programming**
- Experience with **failure analysis methods** or physical/chemical analysis methods
- Interest in **semiconductor physics**
- A **quick comprehension** and a **stress-resilient** and **flexible** working style
- A **communicative** personality and are able to **work in a team**
- Skills in **problem solving**
- Excellent **English** and good **German** language skills
