

## Senior Functional Safety Quality Manager - Automotive (f/m/div)\*

### Job description

Are you passionate about delivering quality at the highest level? Do you want to participate in the exciting technological evolution of automotive power electronics and power distribution? Then we have a great opportunity for you. As Senior Functional Safety Quality Manager - Automotive (f/m/div)\* you will be responsible for managing and securing product quality and safety throughout the product lifecycle, development and change in order to set the stage for successful and long-lasting customer relationships.

In your new role you will:

- Be responsible for **confirmation measures to ensure ISO 26262 compliance** by conducting **audits, assessments and reviews**
- Execute continuous **assessment in ISO 26262 development projects** and assess the **process conformity** for all safety-relevant work products
- Ensure that **corrective actions for identified deviations are agreed and adequately addressed** to achieve the requirements of ISO 26262
- Provide **guidance to project teams** for an effective and efficient **achievement of compliance**
- Contribute to **ISO 26262-related development processes, tools and methods** within the Business Line and within the Automotive Division
- Contribute to the **definition and rollout of cyber security quality management role** within Automotive

This job is suitable for full- and part-time.

### Profile

You live up to high quality standards, work effectively and have a good sense for costs. You strive for continuous improvement besides developing and implementing effective solutions. Even in complex situations and uncertain times, you remain aware of the big picture to achieve your goals. Additionally, you are pro-active team player, with excellent organizational and communication skills.

Beyond, you are best equipped for those tasks if you have:

- A **degree in Electrical Engineering, Physics** or similar
- **At least 6 years of relevant professional experience** in an R&D or quality management role, ideally within the semiconductor industry
