

Staff Specialist Firmware/Hardware Integration (f/m /div)*

Job description

As open and communicative person, you are looking for a new challenge in developing future automotive sensor applications. This is your chance to become part of a team of highly trained firmware and hardware developers. Don't hesitate and apply now!

You'll be part of a team of highly trained firmware and hardware developers situated in Villach. Your focus will be on embedded firmware design and its integration in related hardware for automotive sensor products, in close cooperation especially with concept and digital hardware development engineers.

In your new role you will:

- Be responsible for the **design, implementation & unit verification of embedded firmware** using virtual prototype
- **Support firmware integration, verification and debugging** by RTL simulation
- **Support and implement hardware RTL design** of firmware controlled or supportive peripheral blocks
- **Participate in requirement capturing, architecture definition**, design implementation, code and document work product reviews
- **Cooperate Inter-team** (hardware, firmware and verification) for **debugging** and **analyzing the problems** related to the assigned functional area
- **Implement the suitable development processes** (e.g. ISO26262, ASPICE) in her /his area of responsibility

With this position you will be entering our „**Technical Ladder**“: our career path for experts. You will be able to focus deeply on technology – while further pursuing your career. As you continually expand your expert knowledge, puzzle over matters and solve problems, you will position yourself as a thought leader – thus helping our products improve our world a bit more each day.

Profile

You are best equipped for this task if you have:

- Finished a **degree** from a **university/university of applied sciences** in **Electronics Engineering, Computer Science** or equivalent
- Work **experience of 3-5 years** in **development and verification of embedded system**
- Proficient **know-how in C/C++ and scripting languages**

At a glance

Location: **Villach (Austria)**
Job ID: **351491**
Start date: **as soon as possible**
Entry level: **3-5 years**
Type: **Full time**
Contract: **Permanent**

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Automotive (ATV) shapes the future of mobility with microelectronics enabling clean, safe, and smart cars –

Our semiconductors are essential for supporting the automotive megatrends: electromobility, automated driving, connectivity, and advanced security. They link the real and the digital world, driving the ever-advancing pace of automotive digitalization. Infineon **ATV** is the number one semiconductor partner in the fast-changing automotive world, based on our system knowledge and our passion for innovation and quality.
