

## Internship: System Verification Engineer

### Job description

We are looking for motivated and committed students (f/m/div)\* who are willing to learn new things and work in an innovative company acting on a global scale. An exciting working environment characterizes this internship as well as an attractive salary. Apply now for this internship in Graz and support our team.

In your new role you will:

- Support the **system verification execution** of the hardware and system products
- Work with system verification engineers to **develop verification plan** based on requirement specification
- Be part of the **development of new test cases** in Java/Python
- Assist with the **design of new verification boards**
- **Execute** targeted **verifications** and **evaluate results**
- Contribute to the **test bench specifications** and **implementation**
- Contribute to **test automation methodologies** and **implementation**

#### Further Information:

Type of employment: Temporary / Part-time (flexible working hours from Monday to Friday between 6 a.m. and 7 p.m.)

Duration: min. 6 months

### Profile

You successfully meet the requirements, if you are a motivated and committed student from the field of **Electrical Engineering, Software/Computer Engineering, Physics** or similar. You are best equipped for this task if you additionally offer:

- Strong **interest** in **hardware** and **product verification** as well as **validation**
- Good **analytical skills** with **problem-solving abilities**
- An open mindset with a **focus** on **quality** of results
- **Lab experience** and **soldering skills**
- **PCB design** and **programming skills** in Java and Python for verification purposes
- Knowledge of **NFC-Forum, ISO14443** and **EMVCo specifications** as a plus
- Ability to communicate in **English** and/or **German**, as well as to work effectively within a team
