

Product Engineer Automotive (f/m/div)*

Job description

Would you like to collaborate closely with production, test engineering, and design in order to identify possible weaknesses of the product, the test program and/or the fabrication process during development and production ramp up? Then come and join our team as Product Engineer Automotive. Apply now, if this job sounds interesting to you!

In your new role you will:

- **Collaborate closely with production, test engineering, and design** in order to identify possible weaknesses of the product, the test program and/or the fabrication process during development and production ramp up
- **Assist in ensuring manufacturability of products** by yield, fail pareto and test coverage analysis
- **Support the analysis of root cause of deviations from production targets** (quality, performance or cost)
- **Support ramp of new products** and **rapidly improve test yield**
- **Contribute to special lot clearance** and **actively manage associated risks**
- **Strengthen the competitiveness of our volume products** with continuous product optimization and efficiency improvements
- **Strive for continuous improvement** in all aspects of the job
