

Product Manager for Gate Driver Integrated Circuits Products (f/m/div)*

Job description

Do you want to make a difference in a fast-growing business? Do you want to work at the edge of the current megatrends, decarbonization and digitalization? Are you a talented communicator within a cross-departmental organization who has a passion for technical topics? Then, we have a great opportunity for you to join us as a Product Manager for our expanding Gate Driver Integrated Circuits (ICs) for industrial and automotive applications. Be part of our PSS (Power and Sensor Systems) Division and bring this portfolio to the next level!

In your new role you will:

- **Drive the expansion** and **go-to-market** for our Gate Driver IC portfolio, including scaling in the solar and telecom space as well as entering the automotive segment
- **Engage in close collaboration** with our regional product and application management as well as application engineering and sales to **drive design- and business wins**.
- **Elaborate, together with Technical Marketing and Application Marketing, on technical collateral materials** and **trainings/webinars**
- **Manage the product portfolio** through its lifecycle and develop short and long term product volume and revenue forecasts
- **Decide and execute the pricing strategy**, manage pricing guidelines, quotations and limits
- Capture global **product requirements** and support the development of new product ideas

Profile

You anticipate even the future needs of client and engage actively with the client about these needs. You remain aware of the big picture even in complex situations and take decisions despite uncertain circumstances.

You are best equipped for this task if you have:

- A degree in **Electrical Engineering, Industrial Engineering, Business Administration** or similar
- At least **5 years** of relevant work experience in **Marketing and/or Sales** with a technical background

At a glance

Location: **Munich (Germany)**
Job ID: **352133**
Start date: **as soon as possible**

Contact

Bari Guritno
Talent Attraction Manager

- Proven experience in **Product Management, Business Development** or **Technical Marketing** in the electronics industry
- A positive, enthusiastic and self-driven attitude to **interact successfully with internal and external stakeholders on a global level**
- You are a real **team player** contributing with both marketing competency and hands-on support when needed
- Fluent **English** communication skills – German language is a plus

Benefits

- **Munich:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; On-site creche and kindergarden with 120 spots, open until 6pm; Holiday child care; On-site social counselling and works doctor; Health promotion programs; On-site gym, jogging paths, beachvolleyball, tennis & soccer court; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement ; Performance bonus; Reduced price for public transport and very own S-Bahn station; Access for wheelchairs

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

–Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –

Infineon **PSS** semiconductors are enabling intelligent power management, smart sensitivity, and fast, reliable data processing in an increasingly digitalized world. Our state-of-the-art power and connectivity devices make chargers, servers, mainboards, power tools, and lighting systems smarter, smaller, lighter, and more energy-efficient. In addition, our trusted sensors give things an intuitive sensing capability to make them contextually aware, and our RF chips support fast and reliable data communications.
