

## Specialist Project Management (f/m/div)\*

### Job description

Do you describe yourself as a natural driver and a project expert with great networking capabilities and experience? Are you open to new ideas and pushing them to their full implementation and application? In this role, you support diverse projects and follow up on project execution.

In your new role you will:

- **Support the Project Manager** for product or system development projects
- **Unify Project Management processes and project setups** based on analysis and gathered experience
- **Create and align project plans**
- **Support the risk management and resource allocation**
- **Setup and maintain the internal documentation** framework
- **Execute the change requests** and do regular reporting
- Be **responsible for own small work packages** or subprojects

### Profile

You like to collaborate with multiple stakeholders and you are the definition of a communicator; your way of being inspires and encourages your colleagues to succeed. You resolve conflicts in a highly effective and sustainable manner. You like to work with responsibility and connected freedom in decision making processes. Organizing and coordinating multiple work streams is just common for you. You recognize new opportunities and cooperate across boundaries to pursue them effectively. At the same time, you remain aware of the big picture.

You are best equipped for those tasks if you:

- Have an **academic degree in Physics, electrical engineering** or similar
- Have **up to 1-year relevant working experience** with project management as team member or even project leader
- Have the ability to **think analytical and have a structured working style**
- Are open minded to **work with cross organizational and cross-cultural teams**
- Are **talented in communication and organizational tasks**
- Have **very good English language skills**, German is a plus
