

Project Director System Projects (f/m/div)*

Job description

Do you describe yourself as a natural driver and a project expert with great networking capabilities and experience? Are you open to new ideas and pushing them to their full implementation and application? In this role, you manage and control complex projects over their entire life-cycle and ensure hand-over to the sustaining function. This position is part of Infineon's Project Management Career Path. It is meant to provide an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- **Manage complex development projects** for system level integration of security microcontroller
- **Be responsible for the project planning, execution and controlling over the project lifecycle**, including various subprojects like Software, Hardware or Assembly
- **Lead an interdisciplinary and cross-site project team** in a global organization with different locations and cultural backgrounds
- **Manage communication to internal key stakeholder** and external partners, support customer interaction
- **Drive a pro-active risk management**, identify possible mitigation options and define appropriate planning scenarios
- **Handle the project in a fast and market driven environment** with a clear focus on key objectives
- **Commit yourself to the results of your own team and the company as a whole**

Profile

You like to collaborate with multiple stakeholders and you are the definition of a communicator; your way of being inspires and encourages your colleagues to succeed. You resolve conflicts in a highly effective and sustainable manner. You like to work with responsibility and connected freedom in decision making processes. Organizing and coordinating multiple work streams is just common for you. You recognize new opportunities and cooperate across boundaries to pursue them effectively. At the same time, you remain aware of the big picture.

You are best equipped for those tasks if you:

- Have an **academic degree in Physics, electrical engineering** or similar, **PhD is a plus**

Julie Danielsen Larsen

Talent Attraction Manager

- Have at least **8 year of relevant working experience** in semiconductor industry, preferably on system level integration of ICs
- Have at least **6 years professional experience as Project Manager, IPMA C certification is a plus**
- Have a proven **ability to lead complex projects with various subprojects**, which are either organized in an agile or a classical way
- Have **exceptional leadership and coordination skills** to steer cross functional and cross organizational teams as well as external partners
- Are very **self-driven with a high degree of communication and presentation skills**
- Have **excellent English language skills** in verbal and written communication, **German is a plus**

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Connected Secure Systems (CSS) is at the heart of the IoT –

The **CSS** division provides end-to-end systems for a connected, secured world – building on trusted, game-changing microcontrollers as well as wireless and security solutions. CSS delivers microcontrollers plus Wi-Fi, Bluetooth® and combined connectivity solutions (known as connectivity combos) along with hardware-based security technologies to power the broadest application spectrum spanning consumer electronics, IoT devices, cloud security, IT equipment, home appliances, connected cars, credit and debit cards, electronic passports, ID cards, and more. The division is at the forefront of computing, wireless connectivity, and trusted technologies that are helping to securely connect the networked systems of today and tomorrow.
