

## Head of Technology Development (f/m/div)\*

### Job description

Are you looking for a new challenge for your career? Do you like to work in challenging environments, which demand you to think critically and to achieve ambitious targets? We have just the right stage for you to perform! We are looking for a leader, willing to inspire others, passionate for technology with strong management skills! Join our team in Cegléd as Head of Technology Development and become part of a highly skilled and dynamic team.

As Head of Technology Development, you will be responsible for the implementation of technology development strategies and methods to meet business goals and operational needs in terms of cost, quality and productivity. You will drive Key Performance Indicators within your area of responsibility and make sure that all projects are delivered on time, cost and fulfill high quality standards. You work with internal and external stakeholders ensuring best in class performance. You'd have the opportunity to work with an experienced development team, providing them leadership, inspiring, coaching, and mentoring them as well as enabling them to achieve the goals within their areas of responsibility and succeed in their roles.

In your new role you will also:

- Be responsible for overall functions and activities of **Technology Development**;
- Develop **strategic planning, setting of department objectives, defining KPIs** and tracking them;
- **Plan team resource** as well as **develop organization and competency** to ensure smooth project execution and achievement of business goals;
- **Prioritize tasks and projects** based on business impact and available resources, in cooperation with the rest of the leadership team;
- Keep cooperation with manufacturing to **ensure stable production running**;
- Drive **continuous improvement** and **problem-solving activities** within the area of responsibility;
- Plan and manage the annual **Unit Process Development** budget;
- Manage Internal and external **stakeholders**.

### Profile

You are passionate about your expertise and you have a great set of analytical skills and a problem-solving mindset, that allow you to solve problems in an efficient way. Even when you are under pressure and facing complex situations, you remain focused on solutions, acting with resilience. You communicate clearly and efficiently, cooperating as a team player, acting to inspire and motivate, thus establishing good relationships and contributing to a great team environment.

## Why Us

**Part of your life. Part of tomorrow.**

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

### Backend

The backend segments enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

*\* The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*

Does this sound like just the right challenge for you? If so, we look forward to getting to know you!
