

## Digital Design Engineer (f/m/d)\*

### Job description

Design your new dream career at Infineon Technologies! Our Connected Secure Systems (CSS) business unit in Graz is currently looking for a talented "Digital Design Engineer" to work on the development of our state-of-the-art security controllers! Even if you don't know it yet, our security chips are already a fixed companion in your everyday life. In the form of contactless payment methods, ID cards, passports, etc., they make your life not only easier, but also more secure. Did you know that Infineon is the leading provider of security solutions? It offers tailored and ready-to-use security solutions serving a wide range of applications from smart cards to new, emerging use cases. Chip in and help designing the future of CSS!

As a **Digital Design Engineer**, you will work on exciting topics like **test case development**, **RTL** and **Gate-Level simulation** as well as **regression**. Additionally, your new role will include **verification sign-off** for **Tapeout**. It takes **technical skills and accuracy** plus a **communitive nature** to get the job done. You will work in an **international team** with interfaces to **layout**, **design** and **verification engineers** as well as **SoC implementation**.

In this job, you will be responsible for:

- Elaborate **Verification Concept** and **Plan**
- **Test case development**
- **RTL** and **Gate-Level simulation** and **regression**
- **Verification sign-off** for **Tapeout**
- **Formal RTL verification**
- **Toplevel RTL Design**

### Profile

You live up to **high quality standards**, strive for continuous improvement and you develop and implement effective solutions. As a **true team player**, you cooperate across boundaries and contribute with your **hands-on** and **detail-oriented mentality**. Due to your **structured** and **methodical working style** you are able to handle abstract matters and communicate complex topics in a condensed form.

are best equipped for this role with the following knowledge, experience and skills:

- A **university degree** of Applied Sciences in **Electrical Engineering** or similar.
- Good knowledge of **HDL** (System Verilog, Verilog, VHDL)

## Why Us

**Part of your life. Part of tomorrow.**

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– **Connected Secure Systems (CSS) delivers security for the connected world –**  
**The Connected Secure Systems (CSS)** segment offers comprehensive systems for a secure, networked world with a portfolio built around reliable, trendsetting microcontrollers as well as wireless connectivity and security solutions. Over the past decades, CSS has developed microcontroller, Wi-Fi, Bluetooth and combined connectivity solutions (known as connectivity combos) and hardware-based security technologies. The products are used in a broad range of applications: from consumer electronics, IoT and home appliances to IT equipment, cloud security and networked cars all the way to credit and debit cards, electronic passports and IDs. With its leading technologies in the areas of computing, connectivity and security, CSS makes a decisive contribution to protecting today's and tomorrow's networked systems.
