

Product Application Staff Engineer (f/m/div)*

Job description

Are you passionate about E-Mobility? You want to be part of a creative, innovative, global and cross-functional team and shape the future of mobility? For our Product Line Integrated Drivetrain Solutions within our Automotive Business Line Power Integration & Supply, we are looking for a Staff Engineer Product Application Engineering who enjoys being the technical expert for our internal and external customers and drives our global Go to Market Activities for high voltage gate drivers to the next level. With this position, you will enter our "Technical Ladder" career path. The Technical Ladder is a special career path for those who share innovative ideas, demonstrate comprehensive technical knowledge, show thought leadership, possess problem solving abilities and are able to create business value.

In your new role you will:

- **Support our customers** on application and system level
- Act as **trusted advisor for defined customers for all related technical aspects** and build long-term and trustful relationships
- Be responsible for **product lifecycle from availability of samples until launch and design in support**
- **Collaborate in interdisciplinary, worldwide and cross-functional teams**
- Support in the **definition of new high voltage IGBT/SiC gate drivers**
- Prepare **customer documentation and tools** such as **Datasheet, Application Notes, User Manual, Evaluation Kits and Demo Boards**

Profile

As a self-driven, pro-active and true team player, you collaborate with people from different functions and cultures to continuously deliver outstanding results. Your customers are always at the heart of your thoughts and actions and you are able to establish trusting and long-term relationships. Furthermore, you have the passion and the courage to develop creative ideas and new solutions, which you explain in a clear and convincing manner.

You are best equipped for this task if you have:

- A **degree in electrical engineering** or a related field
- **3 to 5 years of relevant work experience** e.g. in Application Engineering, System Engineering, Technical Marketing or R&D
- **Know-how in High Voltage Gate Drivers** is a plus
- **System knowledge in Electric Drivetrain applications** (e.g.: MotorControl, Main Inverter, DC-DC and on-Board Charger)
