

Senior Product Application Engineer (f/m/div)*

Job description

We are looking for a Senior Product Application Engineer in the Embedded Power Technical Marketing team. Would you like to be part of the Technical Marketing Team, acting as world market leader in low-voltage Motor Control applications and technically support the customers at global level? Interested? – Then make sure to apply now!

In your new role you will:

- **Be part of the Technical Marketing Team**, as world market leader in low-voltage motor control applications
- **Technically support the customers at global level**, acting as second level contact for embedded power products
- **Enable Go-2-Market**, defining and executing the collaterals roadmap such as application notes, videos, demonstrators and reference designs
- **Prepare and execute customer presentations and product/application trainings**
- **Plan and implement application tests** in the laboratory
- **Actively cooperate with FAE / R&D / MKT colleagues at global level**, with regards to new product introductions and customer support in motor control applications.

Profile

You are able to quickly establish a successful cooperation and recognize and use different areas of expertise and skills of the team members. You are personally committed to the customer's concerns and award them a high priority and listen actively to the customer and consider his point of view, thoughts, and ideas. You strive for continuous improvement and promote an awareness for quality in your area of work.

You are best equipped for this task if you have:

- A **degree in electrical engineering, physics** or a comparable technical or scientific subject
- **Preferred 1-3 years of professional experience** related to **application engineering** or **development in the semiconductor industry**
- Knowledge of **analog, digital and mixed-signal devices**
- Experience with **ARM® CORTEX® microcontroller**
- Experience with **LIN and CAN communication**
- **Programming skills in C**
