

Technician Maintenance

Job description

Provide line support for equipment setup, recovery & corrective maintenance to meet KPIs defined in respective functional area

In your new role you will:

- Provide line support for equipment setup, recovery & corrective maintenance to meet KPIs defined in the respective functional area
- Perform Preventive Maintenance (PM) and complete PM documentation as required (e-checklist & TECO)
- Ensure the compliance to 5S, Cleanroom & Safety Protocol
- Minor troubleshoot equipment failures, identify the root cause and perform corrective action.
- Increase in responsibilities as well as depth and breadth with the competency level of the tasks executed and technical expertise acquired through professional experience on the job according to the targeted role.
- Contributes to the accuracy of quality in the area and can therefore impact closely related work teams.
- Work as a team member of an integrated team to maximize tool availability and process yield.
- Must be able to understand priorities of work in progress.
- Requires working with toxic gases/chemicals, high voltage, and mechanical hazards with respective personal protective equipment
- Identify safety requirements including lockout / Tagout, and write required procedures.
- Solves known problems using basic troubleshooting skills and can function independently in specified areas.
- Troubleshoot, diagnose & solve infrequent problems independently in specified areas by utilizing methodical problem solving and Statistical Process Control.
- Must have good communication skills as they interact with manufacturing and engineering in addition to their own team.
