

Senior Director Data Governance (f/m/div)*

Job description

You are excited about playing a key role in shaping Infineon's strategic plans as well as in managing individual corporate strategy projects? In addition, do you possess strong communication and interpersonal skills to navigate the business and technical environment? As Senior Director Data Governance, you will establish and drive the implementation of organization-wide data governance guidelines, policy, standards and processes to enable effective value creation from data. That sounds interesting to you? Then don't miss the chance and apply now!

In your new role you will:

- Lead the **central data governance office**
- Develop data governance and define **data governance vision and mission**
- Determine, establish, implement and maintain **rules, standards and operational processes**
- Collaborate with the **Data Governance Board** to define organization-wide cross-domain data governance, data quality, and data protection standards and processes and **prepare recommendations for the Digital Council**, Infineon's top-level Management Board for Digitalization
- Drive mindset shift and **adoption of data governance**, defining and communicating **governance guiding principles**
- Coordinate with **data owners and data stewards** as well as process owners on data governance within domain (central contact person for the functional data owners)
- Prepare and lead **management-level decision rounds** for data governance topics

Profile

You have the ability to solve problems and manage simultaneously and concurrently multiple layers of complexity - including large and complex programs as well as operational projects. Shifting or competing priorities effortlessly whilst working independently in a fast-paced and rapidly changing environment, is easy for you. In addition, you demonstrate strong stakeholder management skills and ability to structure, scope and manage a project through to completion. Your effective communication skills allow to gain executive-level buy-in and understanding of digital concepts, tools, and connection to overall financial targets and strategy.

You are best equipped for this task if you have:

- A degree in **Business Administration, (Business) Informatics, Industrial Engineering** or something related
