

Director Data Quality (f/m/div)*

Job description

You are looking forward to playing a major part in developing Infineon's strategic plans and leading individual corporate strategy projects? Furthermore, you bring strong communication and interpersonal skills to navigate in business and tech environment? As Director Data Quality, you will define data quality standards, drive data quality improvement initiatives and monitor data quality across the organization to enable efficient value capturing from data. If this sounds interesting to you, don't hesitate and apply now!

In your new role you will:

- Harmonize data quality and develop **data quality related corporate rules, standards and processes**
- Establish, maintain and radiate **data quality guidelines for the organization**
- Drive **data quality initiatives** together with business and functional data owners and encourage the **centralization of data cataloguing** by introducing appropriate standards and empowering users
- Monitor **data quality across domains**, evaluate data quality and **identify action needs**
- Monitor **achievement of goals and objectives** for data quality management, implement and consolidate data quality **KPIs and SLAs**, provide **cross-functional scorecards and dashboards**
- Align with stakeholders to ensure **improvements of the data foundation** where it creates the most value

Profile

You have the ability to solve problems and manage simultaneously and concurrently multiple layers of complexity - including large and complex programs as well as operational projects. Shifting or competing priorities effortlessly whilst working independently in a fast-paced and rapidly changing environment, is easy for you. In addition, you demonstrate strong stakeholder management skills and ability to structure, scope and manage a project through to completion. Your effective communication skills allow to gain executive-level buy-in and understanding of digital concepts, tools, and connection to overall financial targets and strategy.

You are best equipped for this task if you have:

- A degree in **Business Administration, (Business) Informatics, Industrial Engineering** or something related
- At least **7 years of professional working experience** in the field of IT (ideally in advanced industries); thereof at least **5 years in management or an executive role**
