

Senior Specialist Production Logistic Planner (f/m /div)*

Job description

Are you looking for a challenge that allows you to make use of your customer-oriented mindset and demonstrate your high-quality standards? Then this might be the opportunity you have been waiting for! Our team in Cegléd is looking for a skilled and motivated Senior Specialist Production Logistics Planner to join them in taking responsibility over logistics planning operations.

As our next Senior Specialist Production Logistics Planner, you will actively contribute for the accuracy and timeliness of the production process. You will monitor the production process to ensure the orders are completed on time, therefore contributing to an optimal performance. Besides that, you will contribute to the material supply flow and identify any shortages or bottlenecks in usage.

In your new role you will:

- Create weekly **production plans** and actively check the raw material availability;
- Handle manufacturing orders in **SAP** (open, release, change, etc.);
- Actively **communicate** and **cooperate** with capacity planners, material planners, production and supply chain planners;
- Monitor and report the established **KPIs** and analyze **root causes**;
- Maintain and provide daily, weekly and monthly **reports**.

Profile

You demonstrate strong communication skills and know how to establish lasting relationships and networks. Your analytical thinking and good planning skills allow you to predict potential risks and as a true team player you are eager to discuss the most reliable solutions within your team. Your problem-solving abilities allied to your customer-oriented mindset will support your path towards improvements and innovative suggestions.

You are best equipped for this task if you have:

- A University Degree in **Industrial Engineering, Economics, Supply Chain, Logistics**, **Business Administration**, or equivalent;
- At least 1 year of experience in a **multinational company**;
- Strong work experience in the **planning area** (production, demand, material);

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

Backend

The **backend segments** enable the development of comprehensive innovation across the entire value chain: starting with chip manufacturing, to wafer testing, preassembly, package development and development of new materials. The backend cluster combines the competencies for planning, productivity, innovation and quality, assembly and testing.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*

Does this sound like just the right challenge for you? If so, we look forward to getting to know you!
