

Principal Engineer Digital Design - Team Lead (f/m /div)*

Job description

As our new Digital Design Team Lead you will have responsibility for the development of our IC digital design team. Additionally, you will be a technical contributor to some projects running in our organization. Have you got a passion to translate theoretical concepts into real hardware designs? Do you have a good understanding of the digital design and verification flow? If you are ready to take your next career step as digital design engineer, this position is your opportunity to join a growing, fast paced and strong design and verification team in Villach. You will shape with us the next generation CO2 reduction and emerging application power-management integrated circuits.

In your new job, reporting to the Chip Architect and Design Head, you will:

- **Lead and develop** the IC digital design team
- **Translate product concept** and **design requirements** into RTL design
- **Cooperate** with concept engineering, analog design, back-end digital team, pre-silicon verification, layout, lab and test engineers
- **Demonstrate clear and consistent communication** with your peers and stakeholders

During an individual training phase, we prepare you optimally for all job related tasks and challenges. With regular feedback and planning of your professional and personal development, we want to ensure your success in this job.

Profile

With your way of being, you inspire and encourage your intercultural team to succeed. You motivate and purposefully make use of the knowledge and experience of each team member to achieve ambitious goals. You are a technical leader with excellent communication skills. You have a good sense of what designers and verification engineers need to execute their work efficiently. Finally, you consider that design integration and design verification are two important steps to confirm your good work and you provide the necessary support for it (simulation review, silicon bring-up).

You are best equipped for this job if you have:

- **A university degree in Electrical Engineering**, Informatics or equivalent
- **At least 8 years experience** in digital design implementation
- **An excellent knowledge of RTL coding** using Verilog or SystemVerilog

At a glance

Location: **Villach (Austria)**
Job ID: **354789**
Start date: **Sep 01, 2022**
Entry level: **5+ years**
Type: **Full time**

- **A good command of behavioral modeling** using SystemVerilog, Matlab or equivalent

We offer competitive salaries and additional benefits based on your performance, experience and qualification. The employment is in accordance with the collective salary and wage agreement for employees of the electrical and electronics industry, employment group I (<https://www.feei.at/wp-content/uploads/2022/05/minimum-salaries-white-collar-workers-2022.pdf>). The monthly salary is paid 14 times p.a. We offer a higher compensation depending on your expertise and skills.

Benefits

- **Villach:** Coaching, mentoring networking possibilities; Wide range of training offers & planning of career development; International assignments; Different career paths: Project Management, Technical Ladder, Management & Individual Contributor; Flexible working conditions; Home office options; Part-time work possible (also during parental leave); Sabbatical; Child care in Villach & Klagenfurt; On-site social counselling and works doctor; Health promotion programs; On-site canteen; Private insurance offers; Wage payment in case of sick leave; Corporate pension benefits; Flexible transition into retirement; Performance bonus; Accessibility, access for wheelchairs

Why Us

Part of your life. Part of tomorrow.

We make life easier, safer and greener – with technology that achieves more, consumes less and is accessible to everyone. Microelectronics from Infineon is the key to a better future. Efficient use of energy, environmentally-friendly mobility and security in a connected world – we solve some of the most critical challenges that our society faces while taking a conscientious approach to the use of natural resources.

– Power & Sensor Systems (PSS) drives leading-edge power management, sensing and data transfer capabilities –

Infineon **PSS** semiconductors play a vital role in enabling intelligent power management, smart sensitivity as well as fast and reliable data processing in an increasingly digitalized world. Our leading-edge power devices make chargers, adapters, power tools and lighting systems smarter, smaller, lighter and more energy-efficient. Our trusted sensors increase the context sensitivity of “things” and systems such as HMI, and our RF chips power fast and reliable data communication. [Click here](#) for more information about working at PSS with interesting employee and management insights and an overview with more #PSSDreamJobs.

At **Infineon in Villach** you shape the technologies of tomorrow and work in an international environment with more than 3700 colleagues from over 65 nations. Your personal contribution will be valued and appreciated as the cornerstones of our success. And all that in beautiful surroundings which guarantee a high quality of life.

The **City of Villach** is located in the center of Carinthia, Austria’s southernmost province, in close proximity to the Italian and Slovenian border. Living in Austria has many social, health-care-related and economic perks. The country’s social and health care system is among the best in the world and for decades numerous international surveys have singled out Austria as a particularly safe and wealthy country with a high quality of life. Villach itself benefits from its status as a “small town”, offering everyday living at affordable prices in an outstanding setting.
