

## Senior Staff Analyst Life Cycle Management (f/m/div)

★

### Job description

Are you interested to support shaping the automotive technology portfolio and apply your very good analytical skills to conduct analysis as basis for management decisions? Are you interested to expand your knowledge by being involved in or even self-driving various Life Cycle Management projects? Acting as a business consultant in the Automotive Life Cycle Management team, you will not only contribute to key projects & concepts in Automotive Operations, but also act as a consultant role to other functions to support critical decision making. Are you ready for this challenge? Then we look forward to receiving your application!

In your new role you will:

- **Consolidate and analyze strategic planning data** (Mid- and Long-Term Planning) to support shaping the Automotive Technology and Product Portfolio
- **Support the Automotive Portfolio Management CoP Lead** (Community of Practice) overall as well as the **sub-leads from other functions** (Supply Chain and Production Management, Marketing and Finance ) **in process, methodology improvement and harmonization**
- **Act as business consultant** towards Automotive Supply Chain and Production Management as well as Business Lines and **propose your best solutions** to support making (critical) portfolio decisions e.g. long-term availability or end-of-life
- **Assist Marketing** on important activities (e.g. yearly customer volume negotiations)
- **Lead Life Cycle Management projects and intensively work with other functions**
- **Drive digitalization and automation projects** using e.g. Tableau, JDA S&OP

### Profile

You collaborate across boundaries and value the contributions of others. By clarifying areas of responsibility, you are able to coordinate your work with your colleagues and share your insights with them on a regular basis. In addition, you are committed to identifying and seizing potential opportunities to improve efficiency. Last but not least, you strive for continuous improvement and therefore work diligently to make things better and more efficient.

You are best equipped for this task if you have:

- A degree in **Business Administration/Management, Industrial Engineering** or similar
