

Senior Engineer Production Management (w/m/d)*

Job description

In this exciting position within the Business Line you have the opportunity to work with some of Infineon's biggest customers and major players in the smartphone industry. You will have a direct link to the latest market trends and work closely with our Operations colleagues to meet our ambitious targets. Are you excited? We are looking forward to receive your online application.

In your new role you will:

- **Lead Technical Ramp-Ups & commit yourself to milestones and targets** regarding cost, yield, volume shipped and quality from start of Ramp-up until ramp up phase completed
- Connect the overall **operational management and controlling of RFS products** in Ramp-up and production
- Be **responsible to define the production strategy** for RFS products
- **Ensure manufacturing delivery and throughput capability** during Ramp-up and volume production phases
- **Be responsible for Cost of Sales improvements** through yield, test or process improvements in close cooperation with all related production sites
- **Lead projects and task force/focus teams** during customer escalations

Profile

You have a driver mentality and passionately aim for results by motivating others for your targets, while always remaining aware of the big picture even in complex situations. As a true team player you enjoy enabling others, cooperate across boundaries and appreciate the contributions of your colleagues. Your excellent communication skills enable you to interact successfully with various stakeholders.

You are best equipped for this task if you:

- Have a **University degree in Engineering, Physics, Telecommunication, Electronics** or a comparable program
- Gained at least **3-5 years of professional experience** within **Product Engineering** or **Production related** areas
- Bring a good understanding and obtained working **knowledge in Front End, Assembly or Test Engineering**
- Are **agile** and willing to adapt to volatile business situations
- Very good **inter-personal skills**

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Power & Sensor Systems (PSS) drives leading-edge power management, sensing, and data transfer capabilities –

Infineon PSS semiconductors are enabling intelligent power management, smart sensitivity, and fast, reliable data processing in an increasingly digitalized world. Our state-of-the-art power and connectivity devices make chargers, servers, mainboards, power tools, and lighting systems smarter, smaller, lighter, and more energy-efficient. In addition, our trusted sensors give things an intuitive sensing capability to make them contextually aware, and our RF chips support fast and reliable data communications.
