

Engineer - Product Engineering

Job description

We are looking for a Produce Engineer to support Yield stability & improvement for assigned devices.

In your new role, you will:

- Support **Yield stability & improvement** for assigned devices
- **Lots' assessment & disposition** to ensure the quality of products delivered to customers meet Infineon's quality and reliability standard
- Investigate and provide **fast feedback** to the production line in case of deviation
- Support **new product releases to production**
- Support **yield and test time improvement**
- Support **device and package qualification** for new product development, fab, assembly, and production transfer

Profile

You are best suited for this position if you have:

- Bachelor's Degree
- 0 to 3 years of **product engineering experience, working on digital, Mixed Signal, or RF/SOC semiconductor devices. RF experience is a plus.**
- Familiar with **IC manufacturing and production flow** including processing, assembly, and production tests
- Familiar with **automated test equipment (ATE)**. **UFLEX or Verigy 93K** would be an advantage
- Familiar with **statistical data analysis tools** and understanding of statistical analysis used in yield improvement

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.
