

Principal Engineer Product Security Certification (f/m/div)*

Job description

Security inspires you? You work on cutting edge security technologies and are involved in the development of the newest generations of security products? You are eager to apply your technical expertise and leadership skills to drive the certifications of our innovative security products? Then you are the right person to be one of our Principal Engineer for Product Security Certification. This position is part of Infineon's Technical Ladder Career Path: a special career path for those who share innovative ideas, demonstrate comprehensive technical knowledge, show thought leadership, possess problem solving abilities and are able to create business value.

In your new role you will:

- **Conduct the security certification of hardware and software products** recognized internationally
- Act within **interdisciplinary teams to collect security specific information** to derive certification scheme specific documentation
- **Enable and support external security evaluations**
- Understand **security concepts and mechanisms** within product families to **lead technical discussions with security evaluators and authorities**
- **Organize and drive joint audits** with external evaluation laboratories and authorities
- **Active participation in conferences** and specialized working groups

Profile

You have the ability to comprehend complex topics and consolidate into the big picture by using your good technical and analytical skills. You bring with you an openminded approach and excellent communication skills. You are interested in learning about processes and willing to discuss and optimize accordingly. With these competencies you are best equipped to motivate others to reach a common goal.

You are best equipped for those tasks if you have:

- An **engineering degree in microelectronics, software development** or similar technical fields
- At least **6 years of experience with microcontrollers or security certifications**
- Basic knowledge of **security products**
- Understanding of **certification processes** (e.g. Common Criteria, EMVCo, FIPS) or other type approval schemes would be beneficial
