

## Senior Manager IT MES (f/m/div)\*

### Job description

Would you like to shape the semiconductor industry by developing innovative IT solutions in manufacturing? Are you quality-oriented and deeply focused on getting solutions? Do you consider yourself eager to further develop your career in an international DAX-company where best practices are constantly shared? Then you are certainly ready to embrace our most recent opportunity and join us as a Senior IT-Manager MES. We are looking forward to your application!

In your new role you will take over the following tasks:

- **Functional leadership for 6 employees at 4 global locations** (Europe and Asia) incl. people development tasks
- Accountable for **Factory Integration Execution Solution / Factory Automation roadmaps** for production sites in Europe and Asia
- Providing and driving **strategic direction of accountable functional areas** in the Factory Integration (FI) & IT environment
- **Governance of Global Factory Automation E2E Solution** as well as workflow automation, and system orchestration layer towards harmonization, technical fitness and sustainable within stringent SDLC process towards target design and architecture compliance
- **Supplier and Vendor** management
- Leading of the **transformation from existing legacy system** into a standardized and target-oriented landscape
- **Collaboration with other Business and IT units**, Manufacturing customers, IT technology roadmap to enable future manufacturing operation and business growth with robust and sustainable solution

### Profile

Your great technical leadership abilities, your strong communication skills and your customer orientation makes you the right person for these tasks. You balance customer requirements and Infineon (future) offerings by analyzing and sharing information comprehensively and effectively. With your excellent network and team player skills and your capabilities you establish and maintain cross divisional technical networks.

You are best equipped for this task if you have:

- A **university degree in IT, Computer Science** or equivalent
- More **than 7 years of relevant working experience of IT and Factory Integration (FI)** application service delivery and operation, including knowledge in various IT /FI application tool and technologies
