

Senior Engineer Quality Excellence (w/m/div)*

Job description

Do you thrive when quality at its highest standards is required? Do you live up to high quality standards and look actively for the ideal solution and engage in professional debates as well as knowledge management with the relevant people, instead of accepting rash compromises? As Senior Engineer Quality Excellence within our division Industrial Power Control (IPC) you support our global quality excellence strategy in an interesting phase of change and shape the next level of quality management at Infineon!

In your new role you will:

- **Contribute to the global innovation process as FMEA moderator** in development teams
- **Introduce a new FMEA software platform** (Plato) within division Industrial Power and Control (IPC) by acting as **role model and trainer**
- **Implement a roadmap for digitalization** to improve our business processes as a responsible coordinator
- **Foster the standardization of procedures** and the introduction of software solutions to become lean and fast
- **Act as internal auditor** within IPC to optimize our process environment
- **Establish a culture of learning** from underlying root causes, e.g. by execution of 3x5 Why- and **knowledge management workshops** and by acting as a role model

Profile

You are able to take in information quickly, see the root causes of problems and develop suitable solutions for them. With your experience you actively promote a learning climate in your area in which problems and mistakes are discussed openly and seen as an opportunity for improvements. Furthermore you inspire others for your innovative ideas and create a positive mindset for quality awareness.

You are best equipped for this task if you have:

- A degree in **Electrical Engineering, Physics, Information Technology**, or a related field
- **3-5 years of relevant work experience**, ideally in the electronics industry **with FMEA**
- **Good knowledge in quality systems, methods, procedures and tools** (e.g. risk management, 8D and six sigma)
- **Good project experience with proven problem solving capabilities**, ideally in an international set-up

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Industrial Power Control (IPC) empowers a world of unlimited green energy –

Power semiconductors play a crucial role in increasing efficiency and reducing energy losses along the whole energy conversion chain.

As the global leader in power semiconductors, Infineon **IPC** delivers pioneering products, solutions and services for smart and efficient energy generation, transmission, storage, and use. We strive to make this planet a greener place where sufficient energy is accessible to everyone – wherever and whenever it is needed. Infineon´s **Quality Management** department acts proactively to satisfy the needs of our customers to increase their success and to ensure 'best in class' product quality. Internally the department develops a living quality culture at all levels within the different divisions and at our partners.
