

## Senior Engineer Factory Integration

### Job description

Are you passionate about supply chain integration and keen on working with colleagues across the globe? If so, we would love for you to join our team in Melaka as a Senior Engineer Factory Integration! As part of this position, you will support Infineon to maintain a future-oriented landscape that will give us a distinct advantage within the semiconductor market. If you are drawn to the idea of further extending and increasing the value-add of our Global Production Network solution, as well as ensuring the secure and reliable data exchange with Infineon sites, you will be the perfect fit for this role!

In your new role you will:

- Be part of Global Organization within the areas of “Delivery and Operations” with focus towards Supply Chain Integration capabilities.
- Support **incident management** for in scope E2M services
- Assess the **operational and problem trends**, identify & enable **optimization measures/solution** in the respective areas to **achieve improvements** in performance, functionality, availability and cost effectiveness.
- Part of Core team to identify and **enable continuous improvements** with the goal to optimizing the delivery and operations of Global Production Network across all FE, BE and external partner sites.
- Provide **2nd and/or 3rd level support**, solution administration, system maintenance, monitoring and operation to meet customer SLA/targets, support IT Service Desk in analysis and dispatching of requests.
- Be part of Global Projects to contribute within the area of Delivery topics (including System Integration Testing, User Acceptance Testing, Training, Documentation and Stabilization)
- Collaborate and coordinate with “E2M Products & Applications” experts, IT, BE, FE, OSAT team members in the area of “Delivery & Operations”.
- Participate and Contribute within the workshops across IFX manufacturing locations in the areas.
- Participate in local/regional/global **corporate program** or initiative inclusive of on-call support for Global “E2M” services.

### Profile

You are best equipped for this task if you have:

- **Minimum 1- 3 years semiconductor experience** with focus on manufacturing execution system and /or supply chain integration areas.

### At a glance

## Why Us

**Part of your life. Part of tomorrow.**

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

Infineon Technologies (Malaysia) Sdn Bhd, with its 8.000 employees, is the largest manufacturing site of Infineon. The company has established itself as a leading manufacturing site for Power Semiconductors, Logic Semiconductors, Discrete and Sensor Products. We are committed to increasing productivity, on-time delivery and providing customized solutions while maintaining the highest level of product quality. The success of Infineon Melaka is evidenced by eleven National Awards received from the Prime Minister's Office as well as 15 corporate awards.
