

Senior Project Manager System Innovation & SW (f/m/div)*

Job description

Do you want to work in the emerging field of quantum computing? Are you passionate about managing and coordinating project activities in terms of performance deliverables, strategies and action plans? Sounds interesting? Then join us as Senior Project Manager System Innovation & SW and become a part of our highly motivated team in Munich! This position is part of our Project Management Career Path. The Project Management Career is meant to provide an attractive career opportunity for employees, who focus on managing projects and functional leadership of project team members.

In your new role you will:

- Lead **system development projects** with significant complexity, novelty and noticeable impact for the PSS organization
- **Manage and coordinate activities in your assigned project** in terms of performance deliverables (Time, Cost, Milestones), strategies and action plans
- Assume full responsibility for your projects by **continuously assessing the progress and adjusting the project plan** to ensure that goals are met even in the face of challenges. This also involves **anticipating and proactively managing** significant changes to the existing project agreement
- **Look at the bigger picture** in order to **identify challenges** and conduct a **forward-looking risk management** to identify possible mitigation measures or backup scenarios in cooperation with your stakeholders
- Form, **guide and motivate diverse, highly innovative experts** to shape a **system solution**
- Manage actively **internal and external key stakeholders** in an international environment, **negotiate trade-offs** and **motivate others** towards common goals
- **Impart knowledge as a project management expert** to other project managers to enable fast learning and execution

Profile

As a Senior Project Manager, you concentrate your creativity and knowledge on producing results with real added value, inspire others for your ideas and explain even complex issues in a clear and convincing manner. Thereby, you remain aware of the big picture even in complex situations, understand the root causes of potential delays or quality defects in time and develop suitable solutions in cooperation with your team members and stakeholders.

You are best equipped for this task if you have:

Why Us

Part of your life. Part of tomorrow.

Infineon is a world leader in semiconductor solutions that make life easier, safer, and greener. Our solutions for efficient energy management, smart mobility, and secure, seamless communications link the real and the digital world.

– Power & Sensor Systems (PSS) drives leading-edge power management, sensing and data transfer capabilities –

Infineon PSS semiconductors play a vital role in enabling intelligent power management, smart sensitivity as well as fast and reliable data processing in an increasingly digitalized world. Our leading-edge power devices make chargers, adapters, power tools and lighting systems smarter, smaller, lighter and more energy-efficient. Our trusted sensors increase the context sensitivity of “things” and systems such as HMI, and our RF chips power fast and reliable data communication.

** The term gender in the sense of the General Equal Treatment Act (GETA) or other national legislation refers to the biological assignment to a gender group. At Infineon we are proud to embrace (gender) diversity, including female, male and diverse.*
