

Hardware Development Project Manager (f/m/div)*

Job description

Do you describe yourself as a natural driver and a project expert with great networking capabilities and experience? Are you open to new ideas and pushing them to their full implementation and application? In this role, you manage and control projects over their development life-cycle and ensure hand-over to the sustaining function. This position is part of Infineon's Project Management Career Path. It is meant to provide an attractive career opportunity for employees who focus on managing projects and functional leadership of project team members.

In your new role you will:

- **Manage projects** with minor complexity of **hardware development of security microcontrollers**
- Be **responsible** for the **project planning, execution and controlling** over the **project lifecycle**
- **Lead a medium sized project team** with members outside the direct working environment
- Manage communication to internal key stakeholders, and support customer interaction
- Drive a pro-active risk management, identify possible mitigation options and define appropriate planning scenarios
- Handle the project in a fast and market driven environment with a clear focus on key objectives
- Commit yourself to the results of your own team and the company as a whole

Profile

You are best equipped for those tasks if you:

- Have an academic **degree** in **Physics, Electrical Engineering, Electronics, Computer Science** or similar
- Have at least **5 years** of relevant working **experience in semiconductor industry**
