

Senior Engineer New Product Integration

Job description

Senior New Product Integration Engineer will represent the final test operation as a single interface to stakeholders during new product introduction and to drive smooth transfer of new products/packages from development to production ramp-up.

In your new role you will:

- Support early engineering activities and requests.
- Coordinate and monitor product safe launch activities.
- Drive production development efforts for new customer products: analyze and develop Manufacturing functions, capacities, and facilities needed for production.
- Work with various functional groups in test production to design and structure the manufacturing workflows for new products.
- Assist in resolving design and supplier issues.
- Drive for creation and update of related documentation (test procedures, assembly instructions, specifications, checklists).

Profile

You are best equipped for this task if you have:

- Bachelor / Masters in Engineering fields Electronic/Electrical engineering, Mechatronics
- Minimum 5 years of experience in production/manufacturing / sustaining engineering environment
- Knowledge of backend assembly and packaging and test process
- Strong backend operations, with an understanding of equipment capability
- Strong knowledge of FMEA and risk assessment & statistical tools
- Knowledge of test manufacturing processes and quality improvement methods
- Strong project management, teamwork, communication, analytical, and problem-solving skills
- Must be an independent, self-motivated, organized, and strong communicator
- Understand requirements of final test operation and new product/package and ensure final test capability and process readiness on time during new product /package launch.
